IECC

INTERNATIONAL ENGINEERING & CONSTRUCTIONS CORPORATION

Engineering
a Better World.

OUR PURPOSE

At IECC – International Engineering & Constructions Corporation, we are a consortium of leading companies united by a single purpose: to build a better world by turning ambitious visions into reality.

Through the combined strengths of our members, we deliver innovative engineering and construction solutions that stand the test of time.

From Oil & Gas, petrochemical, automation, and electrical instrumentation to large-scale infrastructure and industrial developments, our collective expertise blends engineering precision with innovation and an unwavering commitment to quality.

We believe success is built on genuine partnership. By bringing together diverse capabilities and deeply understanding each project's unique demands, we deliver tailored solutions that create opportunity, drive progress, and generate measurable results and lasting value.

With a forward-thinking mindset, we harness advanced technologies and sustainable practices to meet today's needs while building resilience and growth for the future — turning visions into lasting impact for our clients, our members, and the communities we serve.

OUR VALUES

- **Safety**: Safety is our uncompromising priority. We protect our people, our partners, and our communities by holding ourselves to the highest safety standards.
- **Collaboration**: We believe the best outcomes come from strong partnerships. By working closely with clients and colleagues, we achieve shared goals through teamwork and open communication.
- **Innovation**: We embrace innovation as a driver of progress. By integrating new technologies, methods, and ideas, we deliver smarter, more efficient, and sustainable solutions that generate great value for our clients, communities, and people.
- **Excellence**: We provide outcomes that exceed the highest technical, safety, and quality standards. With relentless client focus and strong operational expertise, we ensure exceptional project execution and continuous growth..
- **Sustainability**: We are committed to reducing then Viron mental impact of our operations. mitted to reducing then Viron mental impact of our operations.

SERVICES & EXPERTISE

Engineering

At IECC, we develop **comprehensive engineering designs** for industrial plants and systems that strictly comply with the latest regulations and industry standards.
By integrating **advanced modeling techniques** and a deep understanding of **supply chain** and **construction constraints**, we ensure designs that drive efficiency and quality from concept through completion.

Procurement

Our procurement team manages the acquisition of all **necessary materials** and **equipment**, prioritizing reliability, cost-efficiency, and sustainability.
Thanks to our **extensive network of partners**, we secure quality resources that align perfectly with project schedules and budgets.

Construction

IECC offers **turnkey construction services** for industrial plants and systems, executed with unwavering commitment to safety, quality, and schedule.
Our skilled workforce and robust management processes enable us to successfully deliver complex projects across diverse environments.

Commissioning

We provide expert inspection and diagnostic services to help operators keep their existing plants running safely and efficiently.
Our team performs complete **integrity assessments** to identify wear, corrosion, or obsolescence, and to define the most effective maintenance or replacement strategies.

Maintenance Solutions & Plant Integrity

IECC provides expert inspection and diagnostic services to help operators keep their existing plants running safely and efficiently.
Our team performs complete **integrity assessments** to identify wear, corrosion, or obsolescence, and to define the most effective maintenance or replacement strategies.
By combining **technical know-how**, **field experience**, and **advanced monitoring tools**, we deliver practical solutions that extend equipment and asset lifecycles and optimize plant performance.

Our services include:

- Plant integrity and condition assessment;
- Inspection and diagnostic surveys (visual, NDT, functional);
- Maintenance and revamping planning;
- Failure analysis and life-cycle evaluation;
- Spare parts and modernization support;

We help our clients **maximize reliability**, **reduce downtime**, and **protect their investment**.

Technical Training & Operator Development

We provide customized **training programs** designed to enhance the technical skills and operational awareness of plant personnel.
Our courses combine **theoretical knowledge** with **hands-on practice**, helping operators, technicians, and maintenance teams to manage equipment safely, efficiently, and in full compliance with international standards.

Training areas include:

- Operation and maintenance of valves and mechanical systems;
- Start-up, shutdown, and troubleshooting procedures;
- Safety awareness and best industrial practices;
- Preventive and predictive maintenance techniques;
- On-site and classroom technical sessions;

Each program is tailored to the client's specific equipment and operational context, ensuring **practical results** and **immediate applicability.** We help your teams **build competence, confidence**, and **reliability** in every aspect of plant operation.

Training & Technology Transfer Services

IECC offers **comprehensive training and technology transfer services** aimed at fostering local industrial development and long-term capacity building. Our goal is not only to support our clients' technical and operational needs, but also to contribute to the broader **growth** of the **regional ecosystem** in which we operate.

Through structured programs, workshops, and on-the-job mentoring, we share industrial know-how, promote local expertise, and enable the adoption of advanced technologies.

By transferring knowledge and technical skills, we help **strengthen local industries**, **create employment opportunities**, and encourage **sustainable economic development** aligned with international standards.
